

PVC U GUARD

PVC U Guard riser system is designed to protect power and communications cables installed vertically on the side of a utility pole. The PVC U Guard system is non-conductive, lightweight, high impact resistant, and installed over the cable, eliminating cable pull through.

EXTENDED LIP LINE HOSE

SS Group USA now offers ASTM D1050 certified and tested Extended Lip Line Hose to utilities across North America. SS Group USA looks forward to offering our customers a high quality product that can be relied on and used in the electrical industry.

PVC U GUARD

Our proprietary system is modular, and consists of a length of PVC U Guard coupled with our custom reducer boot to render an elegant one-piece system. This has been built to withstand North America's extreme all season weather conditions

OUR SYSTEM

POLE RISER + REDUCER BOOT PVC U GUARD

A one-piece system that is the perfect combination of quick installation, structural integrity, and cost savings.

PVC U GUARD

PVC U GUARD ADVANTAGES

- NON-CONDUCTIVE**
No need for expensive ground cost
- NON-COROSIVE**
No maintenance
- AFFORDABLE**
Cost effective vs. traditional steel U Guard
- LIGHTWEIGHT**
Easy transportation for lineman
- EASY INSTALLATION**
Fasten with standard lag screws
- FIRE RESISTANT**
Resistance in compliance with UL 651
- CRUSH RESISTANT**
Excellent cold weather impact
- PERFORMANCE**
Compliant with NEMA TC-19
- REDUCER BOOT**
Used to step down to smaller size U Guard
- UNIVERSAL BOOT**
Used to step down to smaller size U Guard

FLANGED PVC U GUARD

EXTENDED LIP LINE HOSE

Meeting all ASTM D1050 standards for testing and certification through Kinectrics Incorporated, one of the leading electrical test facilities in the world, ensures quality and safety for your company.

SS150-10-45C

Class 4 - 1-1/2 Inch
with Coupler Line Hose (4 Foot)

SS150-10-6C

Class 4 - 1-1/2 Inch
with Coupler Line Hose (6 Foot)

CERTIFIED, TESTED & APPROVED

- Highest quality testing standards in the industry (ASTM D1050)
- Certified Kinectrics testing
- Durable, flexible, & safe
- Self locking lip, preventing line hose from coming off the conductor
- Ozone resistance tested
- 60 Hz AC & DC flashover tested
- Electrical proof tested
- Dimensional tested
- Visual inspection tested
- Top quality safety solutions

EXTENDED LIP LINE HOSE ADVANTAGES

COST EFFECTIVE

Beat the competitor with same or better quality

FLEXIBLE

Durable, Kinectrics tested and approved

QUICKER

Lead times to get the product

HIGHEST STANDARD OF SAFETY

Testing and certification
