

SUPER CORFLO®

Super Corflo is a dual-wall coiled polyolefin duct, and is the economical choice for conduit and inner duct applications. The dual-wall design offers a light-weight, easy to handle conduit system with an increased crush-resistance, and semi-smooth inner wall for ease of cable pulling. Super Corflo® can be used anywhere Rigid PVC is used: Inner City work (structures), Solar Farms, or any Open Trench work.

DISADVANTAGES OF USING SCH 40 PVC / DB2

- 🕒 **Time Consuming**
- 📏 **Rigid Material (No Bend)**
- 💰 **Expensive Couplers and Connectors**
- 📦 **Endless SKU's**
- ❄️ **Poor Cold Weather Performance**

SUPER CORFLO® BENEFITS

Super Corflo® is supplied in 250' coils. These coils are tied at various points for easy dispensing in the field. Coils are available in longer lengths to accommodate longer feeds. Longer lengths reduce the need for additional connectors and labor.

Super Corflo® is flexible, reducing the need for costly special fittings to accommodate bends and 90 degree turns, saving time and money.

Super Corflo® can be fed through existing runs, and are completely upgradeable for future needs and requirements.

SUPER CORFLO® FEATURES

- **FLEXIBLE** - Reduces/Eliminates Sweeps and Bends
- **CRUSH RESISTANCE** - Equivalent to Schedule 40 PVC
- **LIGHTWEIGHT** - Easier Installation, 40% Lighter than PVC
- **COMPATIBILITY** - Easily Adapts to Other Conduit Materials
- **GLUELESS COUPLING** - Safe, Quick Assembly
- **GASKETED** - Air and Watertight
- **LOW COF** - Longer Cable Pulls with Lower Cable Stress
- Pre-installed Pull Tapes Available
- Flexibility of Corrugated with Properties of Smoothwall
- 24" Bend Radius, All Sizes
- 250' Continuous Length Coils
- No Memory, Uncoils into Straight Length

SUPER CORFLO® APPLICATIONS

- Underground Residential Distribution
- Street & Highway Lighting
- Substations
- Plow-In
- Under Roadways
- Transformer Vaults
- Secondary Service Runs
- Under Water Applications
- Solar
- Many Other Applications

SUPER CORFLO® SPECIFICATIONS

APPLICATIONS

- Power
- Telecom
- CATV

INSTALLATION

- Direct Bury
- Concrete Encasement

COLOURS

- Outer Wall

Custom Colours Also Available

- Inner Wall - Black

STANDARD PACKAGING

- 250' Coils
